Expressive Arts and Design: Creating with materials	I can be artistic, imaginative and use a variety of materials to create.	Begin to understand that different objects can be used for a purpose.	Explore different materials freely, to develop their ideas about how to use them and what to make.	Understand that resources have a function and explore the way they can be used, such as using a paint brush to paint or sponges to print.	Develop specific techniques, such as colour mixing, to support them in creating specific representations. Understand the function of a range of resources and use these to aid their creations.	Safely use and explore a variety of materials, tools, and techniques, experimenting with colour, design, texture, form, and function.		
		Begin to understand that they can be creative and use materials for a purpose.	Develop their own ideas and then decide which materials to use to express them.	Explore, use, and refine a variety of artistic effects to express their ideas and feelings.	Understand that they can use specific materials and resources for a desired affect and explain their reasoning, for example painting a stem green.	Share their creations, explaining the process they have used.		
		Begin to understand that props and resources can be used within their role play.	Take part in simple pretend play, selecting specific resources and props to support them.	Make imaginative and complex 'small worlds' to support their role play and engage in this with peers.	Develop their own ideas and use available props and resources to express themselves freely, using language learnt from stories.	Make use of props and materials when role playing characters in narratives and stories.
